

**PENINSULA
CLEAN ENERGY**

UPCOMING COMMUNITY MEETING

Please join us on **Tuesday, Sept. 6th at 6:30 pm** for a workshop on a new electricity option in San Mateo County.

The City of San Carlos and the County of San Mateo invite you to learn about Peninsula Clean Energy, a local energy program offering options with higher renewable content at competitive rates for residential and commercial customers.

Starting October 2016, electricity customers in the County will be able to choose their electricity provider. Peninsula Clean Energy customers will receive multiple electricity options, each with a different amount of renewable energy content, at competitive prices.

At this workshop, County staff will explain how Peninsula Clean Energy works, what electricity options are available and the timing for start of service.

This event is free and open to residents and business owners throughout San Mateo County.

For questions or comments, please contact Carolyn Raider at craider@smcgov.org

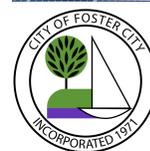

We look forward to seeing you there!

Workshop Location:

San Carlos Library, 2nd floor
610 Elm Street, San Carlos,
CA 94070

Workshop Date:

Tuesday Sept. 6th
6:30 PM

Peninsula Clean Energy offers clean and affordable local energy you can count on.
