

BID Plan Check Turnaround Times

Upon submittal of a Building Permit application and complete construction plans, the Building Inspection Division will monitor the approval process among the various City of Foster City departments. The Building Inspection Division will notify the applicant of Department approvals or comments. Plan check response time goals are based on the scope of any particular project.

Typically if the application valuation is under \$100,000 then you should be notified in one week; if the valuation ranges between \$100,000 to \$1,000,000 then plan check responses will be sent within two weeks of submittal; for valuation over \$1,000,000 approvals or comments should be received within 4 weeks.

If plan check comments are sent to the applicant Department response times from the date of resubmittal will be as follows:

For application valuations to \$1,000,000 then plan check responses will be sent within one week of resubmittal; for those projects valued over \$1,000,000 approvals or comments should be received within 2 weeks of resubmittal.
