**Subject:** Nantucket Cove - Garage Doors

Paul –

To clarify our procedure following our discussion, in order to apply for a Building Permit to replace garage doors in Nantucket Cove, the following information must be submitted:

1. Completed application form
2. Letter from the Nantucket Cove Homeowner's Association indicating their action on the proposal
3. Picture of the existing garage door
4. Cut sheet or brochure showing the design of the new garage door.

The replacement garage door will be required to exactly match the existing garage with inset panels and painted to match the trim color of the unit. Staff has pictures of example garage doors on file that will also be used to determine if the replacement garage door matches the existing doors in the development.

Please let me know if you have any additional questions,
