

CONSTRUCTION SITE ♻️ RECYCLING ♻️

A Guide for Building Contractors
reuse ♦ hazardous waste ♦ recycling ♦ disposal

FREQUENTLY ASKED QUESTIONS

WHAT DOES C&D STAND FOR?

Construction and Demolition.

WHY IS IT IMPORTANT THAT CONSTRUCTION WASTE BE RECYCLED?

A lot of natural resources can be saved by recycling C&D waste, which makes up 24% of the trash going into the landfill. Also, most cities have ordinances requiring that the material be recycled.

DO ALL THE CITIES HAVE THE SAME RECYCLING REQUIREMENTS?

No. Refer to the chart on pages 2-3 for details on a specific city. All cities that do have recycling policies require you to submit recycling and disposal receipts upon completion of the project.

WHY AM I ASKED WHAT CITY MY WASTE CAME FROM?

The State requires each city and county to reduce waste through recycling, composting or other diversion activities. To gather statistics by city, landfill and transfer station gatekeepers ask where the waste is from.

WHAT ARE INERT MATERIALS?

Inert solids include asphalt, brick, concrete, dirt, fines, rock, sand, soil and stone. These materials are also referred to as aggregates.

WHAT IS A MIXED C&D RECYCLING FACILITY?

At a mixed C&D recycling facility, different recyclables are sorted from a load of mixed debris. A load of mixed C&D generally includes drywall, metal, untreated wood, yard trimmings and small amounts of inert materials (large amounts of inerts should go into "rock boxes").

WHAT DOES OX MOUNTAIN LANDFILL ACCEPT FOR RECYCLING?

Ox Mountain Landfill accepts loads of certain materials for reuse onsite. These materials are: asphalt, bricks, concrete, dirt, fines, rock, sand, soil, stone, untreated wood and yard waste. Please see last paragraph below regarding ADC. Loads with untreated wood and/or greenwaste mixed with inerts (asphalt, brick, concrete, dirt, fines, rock, sand, soil and stone) will not be sorted and therefore not recycled. However a load with mixed aggregates only (asphalt, brick, concrete, dirt, fines, rock, sand, soil and stone) or mixed green waste only (untreated wood and yard trimmings) will be accepted for recycling.

HOW DO I MAKE SURE MY RECEIPTS SHOW THAT I RECYCLED MATERIALS?

First, you must make sure that you are taking your load to a facility that can recycle the materials you have. When you are at the gate of any facility, be sure to tell them that you would like to recycle the material and you need a receipt that reflects that. The receipt will indicate that the material was either recycled or disposed.

WHAT IF A DEBRIS BOX COMPANY HANDLES ALL MY WASTE?

To meet local recycling requirements, you will need to request that the debris box company take your waste to an approved recycling facility and provide you with appropriate receipts from those facilities.

WHAT DO I DO ABOUT THE WASTE GENERATED BY MY SUBCONTRACTORS?

The general contractor is responsible for ensuring that the recycling requirements are met for all waste generated on site, including waste generated by the subcontractors.

WHAT IF MY NEW CONSTRUCTION PROJECT GENERATES ALMOST NO WASTE?

All construction projects generate waste and you are expected to recycle it. The industry average for waste generated at new construction sites is six pounds per square foot.

WHAT IS ADC AND WHY DO SOME JURISDICTIONS NOT ALLOW IT TO BE COUNTED AS RECYCLING?

ADC stands for alternative daily cover and is crushed aggregate that is used instead of dirt to cover the landfill on a daily basis. Most of these materials can be used for re-manufacturing into new products, soil amendments and other uses that are considered by some jurisdictions to be a better use of the product. Therefore, these jurisdictions do not count ADC as recycling. See pages 2-3 to see whether or not a city accepts ADC as recycling.

INTRODUCTION & CONTENTS

KNOW YOUR WASTE

UNDERSTAND CITY C&D RECYCLING REQUIREMENTS

Most cities in San Mateo County have a recycling ordinance that requires contractors to recycle most waste generated on the job. Some cities may limit building contractors to a few approved recycling facilities and debris box companies. See pages 2-3 to view city requirements.

2-3

SALVAGE & REUSE (APPLIES TO DEMOLITION ONLY)

Many items such as wood floors, doors, windows, electrical equipment, and bathroom fixtures can be salvaged from a building before it is demolished. You can take these usable materials to a salvage yard, where they will be resold to local builders. See page 4 to determine if salvage is appropriate at your site.

4

HAZARDOUS WASTE

Many types of hazardous waste are found at construction and demolition sites. These materials must be identified and handled correctly prior to demolition and during construction. See page 5 to find a list of potential hazardous wastes and where to take them.

5

RECYCLING

Waste generated at a construction site can be recycled in two ways. One option is to separate recyclables by material, such as cardboard, metal, clean wood, etc., into individual bins. Separating recyclables allows you to take advantage of lower dumping fees. The second option is to put recyclable materials into one bin and take it to a recycling facility that specializes in sorting materials. See pages 6-7 for a list of C&D recycling facilities in the Bay Area.

6-7

DISPOSAL

Any waste that cannot be reused or recycled is disposal. See page 8 for disposal locations.

8

RECYCLING HOTLINES FOR ALL BAY AREA COUNTIES

This guide is brought to you by San Mateo County RecycleWorks, which offers recycling, reuse and green building information to the residents and businesses of the County. See page 8 for recycling hotlines in other Bay Area counties.

8

IDENTIFY HAULING OPTIONS

You may either haul your own recyclable materials or hire a debris box company and request that the material be recycled. Note that in some cities you may be required to use a certain debris box company. See page 2-3 to view city requirements and page 9 for a list of debris box companies.

9

UNDERSTANDING C&D RECYCLING REQUIREMENTS

CITY	C&D ORDINANCE OR POLICY	DEPOSIT REQUIRED	PROJECTS ORDINANCE APPLIES TO	RECYCLING REQUIREMENT D= Demolition C = New Construction Contact cities for the most up-to-date requirements.	DEBRIS BOX REGULATIONS See below for cities with exclusive contracts with specific debris box companies.	NAME OF FORM Contractors must fill out a form detailing their recycling plan. Upon completion of the project, copies of recycling and disposal receipts must be submitted.
ATHERTON 650-752-0560	yes	yes	Any project over \$50,000 or generating more than 10 tons of debris	<ul style="list-style-type: none"> • Must allow 10 working days for salvage prior to demolition • D or C: recycle 60% of total waste • Shingle/shake roofing project: recycle 50% of total waste • Alterations/Additions: recycle 50% of total waste 	Open to all haulers	Construction, Demolition, Recycling Criteria
BELMONT 650-595-7450	yes	no**	All demolition, new homes, and large commercial projects	Builder must pursue recycling through a good faith effort. This effort is monitored and enforced by the Code Enforcement Officer and the Building Division.	Open to all haulers	
BRISBANE 415-508-2120	yes	yes	Demolition over 200 ft ² , remodel or new construction exceeding \$75,000, or re-roofing over 500 ft ²	<ul style="list-style-type: none"> • Must allow 5 working days for salvage prior to demolition. • D: recycle 100% of inert solids*, 50% of other construction debris • C: recycle 50% of total waste • Remodel/Re-roofing: recycle 50% of total waste 	South San Francisco Scavenger Co.	C&D Recycling and Waste Reduction Plan
BURLINGAME 650-558-7260	yes	yes	Demolition, new construction projects, and alterations over \$50,000	<ul style="list-style-type: none"> • D or C or Alterations: recycle 60% of total waste • Limits on use of inert solids* to achieve diversion goals • ADC is not counted as recycled material 	Open to all haulers	C&D Recycling and Waste Reduction Form Compliance Report
COLMA 650-757-8888	yes	yes	All demolition, remodel, construction projects	<ul style="list-style-type: none"> • Must salvage if possible • D: recycle 50% of total waste • C: recycle 50% of total waste • Shingle/shake roofing project: recycle 50% of total waste 	If using a debris box, must use a company with a signed, non-exclusive franchise agreement with Colma	Recycling and Waste Reduction Form
DALY CITY 650-991-8061	yes	yes	All complete demolitions, all alterations over \$15,000, all new construction over \$25,000, all roofing tear-offs over 100 ft ²	<ul style="list-style-type: none"> • D or C or Alterations or Re-roofing • All projects over \$30,000 must submit Waste Management Plan 	Allied Waste Services of Daly City	Waste Management Plan
EAST PALO ALTO 650-853-3189 650-833-1829	yes	yes	All demolition, new single-family, multi-family and commercial	<ul style="list-style-type: none"> • D: recycle 60% soil, concrete/asphalt, 25% other waste • C: recycle 55% concrete/asphalt, 20% other waste 	Open to all haulers	
FOSTER CITY 650-286-3227	yes	yes	All demolition and new construction projects and specified residential and commercial alterations, including roofing projects	<ul style="list-style-type: none"> • Reuse and salvage to the greatest extent feasible • D or C or Alterations or Roofing: recycle 50% of total waste 	Open to all haulers	Waste Management Plan
HALF MOON BAY 650-726-8260	yes	no**	Projects over \$5,000	Reuse, salvage and recycle to the greatest extent feasible	Open to all haulers	Waste Management Plan
HILLSBOROUGH 650-375-7436	yes	no**	All demolition, alteration, and new construction projects	<ul style="list-style-type: none"> • D or C or Alterations: submit and execute approved Recycling and Waste Reduction Plan • If hauling mixed debris, must use approved mixed processing facility • ADC is not counted as recycled material 	If using a debris box, must use a company with a signed, non-exclusive franchise agreement with Hillsborough.	Recycling and Waste Reduction Plan Compliance Report

MENLO PARK 650-330-6704	yes	yes	All residential projects over 1,000 ft ² , Commercial projects over 5,000 ft ²	<ul style="list-style-type: none"> • Must allow 7 working days for salvage prior to demolition • D or C: recycle or salvage at least 60% of total waste • ADC is not counted as recycled material 	Open to all haulers	Construction and Demolition Recycling Deposit Refund Request Form
MILLBRAE 650-259-2444	yes	yes	Projects approved by Planning Commission and all demolitions	<ul style="list-style-type: none"> • Must allow 2 weeks for salvage prior to demolition • D or C: recycle 50% of all waste generated; at least 25% must be from sources other than soil, concrete or asphalt 	South San Francisco Scavenger Co.	Solid Waste Management Plan
PACIFICA 650-738-7341	yes	no	All projects	Specifications according to Green Point Rated certification requirements	Recology of the Coast	
PORTOLA VALLEY 650-851-1700 x211	yes	yes	Any project greater than \$10,000 or generating more than 10 tons of debris; remodels larger than 1,000 ft ²	<ul style="list-style-type: none"> • Must allow 5 working days for salvage prior to demolition • D: recycle 60% concrete/asphalt, 25% other waste • C or Remodel or Re-roofing: recycle 60% of total waste 	Open to all haulers	
REDWOOD CITY 650-780-7450	See last column	no	All new buildings and additions 1,000 ft ² or more	• C: Recycle or salvage 50% per Green Building Regulations	Open to all haulers	GreenPoint Rating or LEED Certification
SAN BRUNO 650-616-7076	yes	yes	Specifications in Tier I of the California Green Building Standards code	<ul style="list-style-type: none"> • C: recycle 65% of total waste • Remodel: recycle 50% of total waste 	Recology San Bruno	Construction & Demolition Waste Reduction Form
SAN CARLOS 650-802-4261	yes	yes	Any project over \$20,000 or generating more than 5 tons of debris	<ul style="list-style-type: none"> • Must allow 5 working days for salvage prior to demolition • D or C: recycle 60% of total waste 	Open to all haulers	Construction and Demolition Waste Management Plan Agreement
SAN MATEO 650-522-7346	yes	yes	Any demolition, construction, or remodel over \$50,000	<ul style="list-style-type: none"> • Salvage as much as possible • D or C: recycle 60% of total waste • Remodel: recycle 50% of total waste 	Open to all haulers	Recycling & Waste Management Reduction Plan
SOUTH SAN FRANCISCO 650-829-6670	yes	yes	Demolition over \$5,000, construction over \$50,000, or size equal or greater than 2000 ft ² . Roofing projects over \$5,000 valuation	• D or C: recycle 100% of inert solids, * minimum of 50% of all non-inerts	South San Francisco Scavenger Co.	Waste Management Plan
WOODSIDE 650-851-6796	yes	yes	Any project over \$10,000 or generating more than 10 tons of debris	<ul style="list-style-type: none"> • Must allow 5 working days for salvage prior to demolition • C: recycle 60% of total waste • D: recycle 60% of total waste, at least 15% must be non-inert material* 	Open to all haulers	Waste Management Plan
UNINCORPORATED SAN MATEO COUNTY 650-599-1496	yes	no**	Demolition projects over \$5,000, construction projects greater than \$250,000 or 2,000 ft ²	• D or C: recycle 100% of inert solids*, 50% of all non-inerts*	Open to all haulers	Waste Management Plan

* Inert solids include asphalt, brick, concrete, dirt, fines, rock, sand, soil and stone.

** Fines or penalties may apply for non-compliance.

SALVAGE & REUSE

DECONSTRUCTION, also referred to as **SALVAGE** or **SOFT DEMOLITION**, is a cost-effective and environmentally responsible alternative to conventional building demolition.

In a deconstruction, hazardous materials are removed, reusable building materials are salvaged, demolition materials are recycled and only a small portion of waste ends up in the landfill.

To successfully deconstruct a building for salvage, you may have a soft demolition contractor identify and remove the usable material or you may extract the material and drop it off at a salvage yard. Please take special care to identify and remove any electrical components that may contain mercury such as lights, thermostats, and switches. These must be treated as hazardous waste.

Examples of reusable building materials:

Architectural details (columns, fireplace mantels, moulding)

Lumber

Steel beams & studs

Wainscoting

Insulation

Siding

Heating ducts

Electrical equipment

Brick & block

Light fixtures

Plumbing fittings

Faucets, toilets & bathtubs

Doors & windows

SALVAGE YARDS & DECONSTRUCTION SERVICE

SAN MATEO COUNTY

GREENWORX

160 S. Linden Ave, Suite 221
South San Francisco, CA 94080
1-888-714-7444
www.greenworxusa.com

HABITAT FOR HUMANITY GREATER SAN FRANCISCO RESTORE

1411 Industrial Road
San Carlos, CA 94070

Accepts and sells a wide variety of salvaged building materials.

MONTEREY COUNTY

RANDAZZO ENTERPRISES

13550 Blackie Road
Castroville, CA 95012
Tel. 1-800-633-9039
Fax. 831-633-4588
www.randazzoenterprises.com
Accepts and sells salvaged building materials. Provides demolition and deconstruction service.

HAZARDOUS WASTE

At a construction site it is very important to be aware of **HAZARDOUS MATERIAL** so you can separate it from other waste and properly dispose of it.

Prior to a demolition, it is necessary to identify and remove hazardous wastes. You should also be prepared to deal with hazardous waste generated during construction and at the end of the project.

HAZARDOUS WASTE ACCEPTED BY THE VSQG PROGRAM

Paints, thinners, stains
Glues, mastics, adhesives
Pesticides, herbicides
Garden chemicals
Cleaning supplies
Oils
Pool chemicals
Batteries
Fluorescent lights
Ballasts
Paint chips (paint jobs done before 1980 contain lead)
Switches and thermostats containing mercury

HAZARDOUS WASTE NOT ACCEPTED BY THE VSQG PROGRAM

Railroad ties
Telephone poles
Pressure-treated wood
Asbestos (visit www.baaqmd.gov for more info)

Take the above materials to the
Altamont Landfill, 925-455-7300
www.altamontlandfill.wm.com

OTHER WASTE NOT ACCEPTED BY THE VSQG PROGRAM

Appliances
Electronic Waste

PROPER DISPOSAL OF HAZARDOUS WASTE:

SAN MATEO COUNTY HAZARDOUS WASTE - VERY SMALL QUANTITY GENERATOR (VSQG) PROGRAM

A VSQG (per state law) is any business that generates less than 100 kilograms (about 220 pounds or 27 gallons) of hazardous waste per month. The VSQG Program is designed to provide an inexpensive hazardous waste disposal option to eligible businesses, non-profits, and other government agencies. See the list of accepted materials to the left.

Visit www.smchealth.org/vsog for details. Call 1-800-207-8222 to make an appointment at the next collection event. Minimal fees.

TRANSPORTING HAZARDOUS WASTE

Legally, you can only transport up to 10 gallons of hazardous waste at one time without a special license and permit. Qualified VSQG businesses may legally carry up to 27 gallons or 220 pounds of a hazardous waste for disposal to the VSQG Facility.

You may also select a hazardous waste management company to collect and haul hazardous waste for you.

IF YOU DO NOT QUALIFY FOR THE VSQG PROGRAM

If your business generates more than 100 kilograms of hazardous waste per month, you will need to find the appropriate commercial hazardous waste management company to handle your material. Companies that provide this service may be found in the yellow pages or by contacting the County's Hazardous Materials Program at 650-372-6200.

RECYCLING

A **SORTING FACILITY** specializes in sorting recyclable construction material. Mixed C&D loads can include all the materials listed below, and the majority of it will be recycled. Large quantities of inert solids (asphalt, concrete, dirt) should be kept separate from mixed C&D loads.

Unless you are taking your recycling to a sorting facility, the following materials must be separated and brought in as loads of only one material type. Some facilities accept **MIXED INERTS** (mixed loads of crushed asphalt, concrete, dirt) for recycling. Mixed inert loads will cost more than separated loads.

RECYCLING FACILITIES	SORTING FACILITY	mixed inert	asphalt	bricks	carpet	cardboard	concrete	dirt	drywall	metal	pallets	porcelain	rock	roofing	wood (untreated)	yard trimmings

DISPOSAL

DISPOSAL FACILITIES

Materials that are NOT RECYCLABLE and are NOT HAZARDOUS should be taken to a DISPOSAL facility. These materials may include mixed plastics, lunch waste, dirty drop cloths, etc. Disposal fees will be higher than fees for recycling separated materials.

HAULING AND DEBRIS BOX COMPANIES

One way of HAULING WASTE from the construction site is through a DEBRIS BOX COMPANY. When you contact a debris box company, you need to request that the material be recycled and receipts be provided. Key questions to ask when selecting a company are:

- What recyclable materials are you willing to pick up?
- Do you offer a reduced fee if recyclables are separated from other waste?
- What are your requirements for separating recyclable materials?
- How much contamination do you allow?

The following areas have exclusive contracts with specified debris box companies or only allow registered debris box companies: Brisbane, Colma, Daly City, El Granada, Hillsborough, Millbrae, Miramar, Montara, Moss Beach, Pacifica, San Bruno and South San Francisco. All other cities may use any of the following companies that haul mixed loads and sorted materials in San Mateo County.
